

Validation

Create or use the Login and Register page and Apply validations on the input fields:

Login page

A login form with a white background and rounded corners, centered on a light gray background. The form contains the title "Login" in bold black text. Below it are two input fields: "Email address" with a placeholder "Enter email" and "Password" with a placeholder "Password". At the bottom is a blue "Login" button.

- if registration is successful then it should display an alert message "Registration Successful"

The image shows a web application interface. At the top, a dark blue alert box with rounded corners displays the text "127.0.0.1:5500 says" in a bold, light blue font, followed by "Registration successful!" in a white font. An "OK" button with a light blue border and text is located in the bottom right corner of the alert box. Below the alert box is a registration form with a white background and a light blue border. The form contains four input fields: a text field with "abc", an "Email address" label followed by a text field with "abc@mail.com", a "Password" label followed by a text field with eight dots, and a "Phone Number" label followed by a text field with "1234512345". At the bottom of the form is a large blue button with the text "Register" in white.
